AI Automated Strategy Recommendation System

This workflow collects client business requirements via Typeform, validates the input, and uses an AI model (Gemini) to generate a custom automation strategy.

The generated strategy is formatted and delivered to the team via email. Invalid submissions and runtime errors are handled through separate notification paths to ensure reliability.

Error Workflow

Any workflow execution failure triggers a separate error-handling workflow that sends an alert email to administrators for quick troubleshooting.

Service Execution Strategy

To: Team Chennai**Client:** Swetha (Saravana stores)

Strategic Growth Plan: 1. EXECUTIVE SUMMARY: This strategy will significantly increase Swetha's profit within 1-3 months and a \$5k-\$15k budget by leveraging hyper-local, value-driven content scriptwriting and copy. We will engage the local community seeking daily necessities through compelling digital narratives and in-store messaging, driving both footfall and repeat purchases, thereby enhancing overall profitability., 2. COMPETITIVE ANGLE: Swetha will differentiate itself by becoming the undisputed 'local daily essential hub'. Our competitive angle will emphasize unparalleled convenience, community embeddedness, and a commitment to fresh, readily available daily necessities. Content will highlight Swetha's personalized service and understanding of local needs, contrasting with larger, impersonal chains, and underscoring why Swetha is the most
